RADIOACTIVITY

Radioactivity that its source is in Caesium 134 and Caesium 137 should not exceed 100 Bq/kg.

This cargo is part of the total quantity loaded of 32,150.000 MT.

Although the inspection was carried out thoroughly and with due diligence, the reported findings are limited to the gamma radiation measurement of the safely and readily accessible portions of the goods only. Due to shielding, energy and absorption effects, this does not serve as evidence that the
